EDAA Lifetime Achievement Award

The lifetime achievement award is given to individuals who made outstanding contributions to the state of the art in electronic design, electronic design automation and testing of electronic systems in their life. In order to be eligible, candidates must have made innovative contributions which had an impact on the way electronic systems are being designed.

The goal of granting the award is to make the excellent work done by people working within the scope described above more widely known and to help to publicize the results.

Recipient of Lifetime Achievement Award 2016
